Today's retailers operate in an increasingly complex environment. As consumers become more empowered through the anywhere availability of information, retailers must identify new ways to keep customers engaged. In many cases there is more data available than ever before, but if it isn't readily accessible and up to date then its value cannot be fully realized. That's where Motion Tablet PCs come in. Designed for mobile environments and featuring tailored retail capabilities, Motion Tablet PCs are driving improved transaction times, reduced abandon rates, and an improved customer experience.

Purposely designed, developed and built for business, Motion mobility solutions are available through a network of value-added resellers and distributors worldwide.

Increase Sales. Improve Inventory Management. Empower Employees.

Motion Tablet PCs are highly mobile, lightweight and rugged solutions proven to significantly impact productivity. From route sales to inventory management to mobile point of sale, retailers are realizing benefits tied to the real time access to data.

"MOST RETAIL WORKERS HAVE HIGHLY MOBILE WORKFLOWS AND SPEND MOST OF THEIR DAY ON THEIR FEET, DRIVING DEMAND FOR A HIGHLY ERGONOMIC AND PORTABLE DEVICE."

DAVID KREBS, VDC RESEARCH

MOTION RETAIL SOLUTIONS

Motion Tablet PCs powered by Intel® processors and Microsoft® Windows® 7 are the only serious solution for retailers that need the reliability and uptime of a durable device, the mobility of a tablet PC, and the business integration required for optimized productivity.

Motion Tablet PCs feature:

- *Integrated transaction processing capabilities*
- *Robust processing options to support virtually any application*
- *Integrated documentation tools*
- *Extended battery life and hot-swap battery capabilities*
- *Dual-touch input for the convenience of touch and accuracy of pen input*
- *Bright, durable displays for anywhere visibility*

DRIVING RESULTS IN RETAIL

- *Reduced Transaction Times*
- *Increased Productivity*
- *Optimized Inventory Management*
- *Reduced Abandon Rates*
- *Enhanced Customer Experience*
- *Increased Mobile Productivity*

"MANY RETAIL ORGANIZATIONS THAT MIGHT NOT HAVE SERIOUSLY CONSIDERED TABLETS PREVIOUSLY ARE TAKING A FRESH LOOK AT THE DEVICES AND RECOGNIZING THE POTENTIAL VALUE THEY CAN PROVIDE."
